

This guide will help you install the Spring Clip and new Snoozle-Vac efficiently and safely. Please follow these instructions carefully.

PARTS INCLUDED:

- The Snoozle -Vac (Fig. 1)
- Spring Clip (Fig. 2)

TOOLS YOU'LL NEED:

- 7/16" socket or wrench

INSTALLING THE SPING CLIP

1. Locate the Spring Clip (Fig. 1) in the plastic bag with this instruction sheet. This clip will help secure the Collector Frame to the Collector Cap.
2. Slide the Collector Frame of the Collector Bag or Corrugated Insert out from the SPS-10 and set it aside.
3. Remove the Collector Cap, and place it upside down on a flat surface. Locate and remove the center nut on the opposite side of the Hinge Tabs with the 7/16" socket or wrench. Save this nut (Fig. 3).
4. Next, pull the nylon top screen away from the frame to expose the bolt. Then, slide the Spring Clip between the grommet of the top screen and the frame and then onto the exposed bolt (Fig. 4).
5. Reattach the top screen grommet and secure with the nut you removed earlier.
6. Now you can re-install the Collector Cap back onto the upper handle bars and slide the metal frame of the Collector Bag or Corrugated Insert back into the Collector Cap and secure it with the Spring Clip (Fig. 5).

INSTALLING THE SNOOZLE-VAC

1. At the front of the SPS-10 Blower Unit, unclip the two latches securing the Blower Inlet Cover and remove it (Fig.6).
2. Locate the Snoozle-Vac (Fig. 2) and secure it to the front of the Blower Unit with both latches (Fig. 7).

USING THE SNOOZLE-VAC

Height Adjustment:

- Locate the two black knobs on the front of the Snoozle-Vac and loosen these knobs to adjust the inlet height (Fig. 8).
- Set to the desired height (recommended: approximately 1/2" higher than your lawn) (Fig. 9).

NOTE: The optimal height setting may vary depending on your specific lawn conditions. Adjust as necessary for best performance.

- Re-tighten the knobs to secure the position.

That's it you're done.

You've successfully installed the Spring Clip and Snoozle-Vac.

If you encounter any difficulties during installation or have questions about optimizing your SPS-10's performance with this new component, please don't hesitate to contact our technical support team.

Thank you for choosing Cyclone Rake products. We're committed to enhancing your lawn care experience with our advanced equipment.
